

## 2.1 Rhodium Triiodide (RhI<sub>3</sub>)

Starting component for catalyst preparation

State:	Solid powder of dark colour		
Specification:	Rhodium (as Rh)	Wt. %	18.5 ~ 21.3
	Potassium	Wt. %	0.1 (max.)

Solubility: Solubility in acetic acid is 99.75% (min.) at CO pressure of 4 bar G and temperature of 100°C.

Storage: To be stored OSBL in a special safe.
